

IMPERIAL FULL HEIGHT TURNSTILE

The Imperial full height turnstile provides a high level of security for premises requiring strict access control. The mechanism is produced to ensure many years of trouble free use, especially for locations with intense passage flows.

All the turnstile models are space efficient security barriers with a compact design, yet offer sufficient space to integrate any access control system. They can be mounted with card readers, biometric readers, remote control and push button units via simple dry contact.

The Imperial model is a bidirectional turnstile with a passage rate of more than 30 person/minute. Status indicator LED lights are located on both directions of the turnstile, in green and red colors to show allowed passage directions. The turnstile is produced in powder coated in any color or 304 grade stainless steel and is suitable for outdoor conditions.

In case of an emergency or power failure, the turnstile provides a fail-safe working solution by allowing free passage on both directions.

OPERATION VOLTAGE:	24VDC+-20%
POWER CONSUMPTION:	30 W
TRIPOD LOCKING:	With 24 V DC solenoids
MOTION CONTROL:	With hydraulic shock absorber
OPERATION TEMPERATURE:	-20°C -+ 70°C
INDICATORS:	LED on both directions
BODY:	Powder Coated or 304 Grade SS
WEIGHT:	350 Kg
DIMENSIONS:	1241x1422x2279mm
OPTIONAL ACCESSORIES:	Button unit, card reader, biometric reader
